

NEWS ANNOUNCEMENT

For Immediate Release

Exivity, a subsidiary of Softlinx, continues its customer base expansion with the addition of National Geographic Society

Westford, MA (June 2, 2005) –Exivity, Inc., the industry’s leading provider of email attachment management solutions for Lotus Domino today announced that National Geographic will be implementing Exivity’s AtomicEMT software to deliver a cost effective solution to control the growth of Domino mail storage without end-user experience change. National Geographic chose the Exivity solution over a number of competitive solutions and found significant mail storage reduction, faster backup and restore time, efficient bandwidth utilization as well as improved server performance.

“Storage space is at a premium and email use is growing exponentially. Email attachments continue to be a problem when it comes to email archiving in general. Network administrators are looking for inexpensive alternatives to solve this problem. By implementing AtomicEMT National Geographic will reduce the overall size of mail files as well as save time and money on expensive storage alternatives”, said Patrick Kelly Vice President of Sales and Marketing at Exivity.

About Exivity, Inc.

Exivity's products reduce the Total Cost of Ownership of enterprise e-mail systems by solving storage demands, while enabling the e-mail content as a corporate information asset. Exivity's current and future product suite leverages a technology foundation to deliver a storage-efficient retention of e-mail contents for regulatory purposes and integration of e-mail content with real-time collaboration tools while achieving productivity gain, cost savings, and a knowledge base. Exivity is a Lotus Business Partner, committed to delivery of R6-enabled products. Exivity is a wholly owned subsidiary of Softlinx, Inc., a leader in enterprise fax messaging and integrated document management solutions, and is located in Westford, MA. Exivity can be reached at +1.978.392.1360 or <http://www.exivity.com>.

About National Geographic

Founded in 1888, the National Geographic Society is one of the largest nonprofit scientific and educational organizations in the world. It reaches more than 285 million people worldwide each month through its official journal, National Geographic, and its four other magazines; the National Geographic Channel; television documentaries; radio programs; films; books; videos and DVDs; maps; and interactive media. National Geographic has funded more than 8,000 scientific research projects and supports an education program combating geographic illiteracy.
