

NEWS ANNOUNCEMENT

For Immediate Release

Exivity announces the availability of AtomicEMT Version 4.3 to support ND7 providing an efficient centralized management of Domino email attachment storage

North Billerica, MASS. (January 25, 2006) – Exivity, Inc., the leader in Domino email attachment management solution, today announces the availability of AtomicEMT Version 4.30 for IBM Lotus Domino. Version 4.30 of the Exivity Domino email attachment solution assures full compatibility with IBM Lotus Domino 7 server and IBM Lotus Notes 7 client.

“Our priority is to provide storage savings for all e-mails, current and legacy.” said Frank Woo, president of Exivity. Frank continues, “This latest version provides capability to process all versions of e-mails from Domino from as far back as version 3 with a single software solution.”

Other key features in this release are;

- Support for attachments from Macintosh Notes clients
- Ability to purge messages from AtomicICE databases when they are no longer needed

Building on the AtomicEMT and AtomicDispatch technology, Exivity solution transparently and securely captures all e-mail messages and redirects them to its Domino “single instance store” repository, resulting in efficient centralized email storage whilst providing easy access and rapid retrieval. Attachments in the e-mail will be replaced with a link to the store. Optionally, for those e-mails without attachments, the body of the e-mail can also be replaced with a link.

About Exivity, Inc.

Exivity's products reduce the Total Cost of Ownership of enterprise e-mail systems by solving storage demands, while enabling the e-mail content as a corporate information asset. Exivity's current and future product suite leverages a technology foundation to deliver a storage-efficient retention of e-mail contents for regulatory purposes and integration of e-mail content with real-time collaboration tools while achieving productivity gain, cost savings, and a knowledge base. Exivity is a Lotus Business Partner, committed to delivery of R7-enabled products. Exivity is a wholly owned subsidiary of Softlinx, Inc., a leader in enterprise fax messaging and enterprise content management solutions, and is located in North Billerica, MA. Exivity can be reached at 978-439-9800 or <http://www.exivity.com>.
