

## **NEWS ANNOUNCEMENT**

*For Immediate Release*

### **Shepherd Center turns to Exivity for its “single instance” Domino e-mail attachment management solution to reduce e-mail storage**

**North Billerica, MA (July 9, 2006)** –Exivity adds Shepherd Center to its expanding customer base. Shepherd Center, a private, not-for-profit hospital located in Atlanta, GA executed an enterprise agreement for the deployment of AtomicEMT and AtomicICE, the optimal storage management solution for the IBM Lotus Notes and Domino messaging and collaboration platform.

Shepherd Center devoted to the medical care and rehabilitation of people with spinal cord injury and disease, acquired brain injury, multiple sclerosis and other neuromuscular problems. AtomicEMT delivers Shepherd Center over 50 percent reduction of its corporate e-mail disk storage by creating a single-instance attachment store of its legacy e-mail content. The storage repository provided an answer to meet requirements for e-mail archives, compliance, collaboration and knowledge management.

“I am delighted to add Shepherd Center, the leader in providing treatment and rehabilitation for patients with intensive Spinal Cord injury, to our customer base.” says Frank Woo, president of Exivity.

AtomicEMT is based on a tiered architecture. AtomicEMT, the first tier, runs on the Domino server, determining the opportunities for mail storage optimization. The original e-mail is stored in the storage tier - the AtomicICE databases, and a link is inserted into the e-mail document. AtomicClient, the client tier, recreates the e-mail with the attachments in place in local replicas. The product fully supports the Notes client e-mail, Web mail, and iNotes, and is fully compliant with Domino ND7. The products have been designed to be transparent to the e-mail end-users. Administration of the software is made easy with a Notes-based interface and requires no changes to any of the standard Notes mail templates.

#### **About Exivity, Inc.**

Exivity's products reduce the Total Cost of Ownership of enterprise e-mail systems by solving storage demands, while enabling the e-mail content as a corporate information asset. Exivity's current and future product suite leverages a technology foundation to deliver a storage-efficient retention of e-mail contents for regulatory purposes and integration of e-mail content with real-time collaboration tools while achieving productivity gain, cost savings, and a knowledge base. Exivity is a Lotus Business Partner, committed to delivery of R7-enabled products. Exivity is a wholly owned subsidiary of Softlinx, Inc., a leader in enterprise fax messaging and enterprise content management solutions, and is located in North Billerica, MA. Exivity can be reached at 978-439-9800 or <http://www.exivity.com>.
